WORK EXPERIENCE

Software Development Engineer

Adobe

February 2024 - Present

San Jose, CA

- Architected a runtime content validation system with caching and fallback that **eliminated crashes** from malformed content, saving over **350K sessions** and speeding up fetches by **60%**.
- Led the end-to-end delivery of the Price Consent feature, **driving technical design** across dependent product, design, and backend teams and owning the initiative from planning through production.
- Spearheaded the student/teacher (STE) verification module for Adobe's NextGen checkout, decomposing it into scoped stories delivering weeks ahead of schedule.
- Drove GraphQL **performance** and **security improvements** including batching, gzip compression, and Redis caching, while adding rate-limiting middleware to protect against request-flooding attacks.
- Designing and building a **cloud-based AI agent platform** that orchestrates tool-enabled agents to automate routine debugging, issue investigation, and low-to-medium complexity code fixes.
- Built an **AST + LLM pipeline** to index the checkout stack's log emissions, powering AI skills that turn natural language into grounded Splunk queries and dashboards, eliminating guesswork and accelerating on-call debugging.

Software Development Engineer

Flipkart

June 2021 - July 2022

Bangalore, India

- Optimized Java services by resolving bottlenecks, improving service scalability and achieving **99.99%** SLA availability.
- Contributed to the development of the **Record and Replay** project, enabling the simulation of a load 5x the capacity of production-grade systems.
- Led the redesign of FinClaim, a platform used by the Finance team to track and resolve claims, reducing resolution time by **47%**.

Software Engineer

Myntra Jabong

July 2019 - October 2020

Bangalore, India

- Architected the development of ScaleIt, a **highly scalable** and **distributed** load testing internal platform, building a proof-of-concept using **ReactJS**, **Go** and **Kubernetes** in under 4 weeks.
- Led a team of 4, further enhancing the platform and reducing hardware resource consumption by over **35%** per team.
- Collaborated with the Release Team to add support for **metric-based deployment** and periodic load tests, reducing rollbacks by **26%** and reducing feature delivery timelines by one day on average.

EDUCATION

Master of Science in Computer Science (3.96 / 4.00)

University of Utah

August 2022 - December 2023

Salt Lake City, UT

SKILLS

Languages Typescript, Python, Go, Java, C, C++

Frameworks ReactJS, ExpressJS, Apollo, Flask, Django, D3

Databases MongoDB, MySQL, Redis, InfluxDB

Tools Jenkins, Grafana, Firebase, SocketIO

Technologies GraphQL, Docker, Kubernetes, Azure
